Use this color chart to make color selections for the following products:

PRODUCT NAME	SPECIAL CONSIDERATIONS
Bomanite Color Hardener	Available in all colors shown. Prices are typically higher for blues and greens.
Bomanite Color Hardener Heavy Duty	Available in all colors shown. Prices are typically higher for blues and greens. Note: The dark aggregate used in Heavy Duty Color Hardener may show over time as the concrete surface wears.
Bomanite Integral Color	Available in all colors shown. Prices are typically higher for blues and greens. Note: Cream, Coquina, Birch Bark and Nickel Gray require the use of white cement.
Bomanite Release Agent	Available in all colors shown. Prices are typically higher for blues and greens.
Bomanite Thin-Set	Available in all colors shown. Prices are typically higher for blues and greens.
Bomanite Micro-Top	Available in all colors shown.
Bomanite Micro-Top XT	Available in all colors shown.
Bomanite Revealed	Available in all colors shown. Note: The aggregate exposed in the finished product has a pronounced effect on the final color. Consult the Revealed Color Charts for swatches depicting aggregate and color combinations.
Bomanite Alloy	Available in all colors shown. Note: The aggregate exposed in the finished product has a pronounced effect on the final color. Consult the Alloy Color Charts for swatches depicting aggregate and color combinations.
Bomanite Sandscape Bomanite Sandscape Refined	Available in all colors shown. Note: The aggregate exposed in the finished product has a pronounced effect on the final color. Consult the Sandscape Color Charts for swatches depicting aggregate and color combinations.
Bomanite Liquid Tint Packs	Water and solvent-based sealers can be tinted in all colors shown.
Bomanite Con-Color	Available in all colors shown. Consult the Con-Color Color Charts for swatches depicting Con-Color applied to concrete.
Bomanite Chemical Stain	NOT APPLICABLE to this color chart. Consult the Chemical Stain Color Charts for swatches depicting Chemical Stain applied to concrete.
Bomanite Concrete Dye	NOT APPLICABLE to this color chart. Consult the Concrete Dye Color Charts for swatches depicting Concrete Dye applied to concrete.

IMPORTANT NOTES

This chart represents the products in an unsealed form. There is no colored curing agent used to achieve these colors and any topically applied sealers or coatings will affect the final appearance. Sampling or mockups provided through your local Bomanite Licensed Contractor is strongly recommended prior to final color selection.

Release Agent is intended as a surface highlighting product only, and will not match the color chart exactly. Certain combinations of Color Hardener and Release Agents can produce dramatically different color appearances than anticipated due to pigment interaction.

When selecting Bomanite Integral Color, variations can be expected due to variations in raw materials within the concrete itself such as cement, sand and water content. Additionally mixes replacing a portion of the Portland Cement with recycled content may greatly affect final appearances. Consistency of color of cement and aggregates as well as the content of the concrete mix design is critical in achieving uniform color from batch to batch. 4" to 5" slumps are recommended. Higher slumps should be achieved by using water reducing or plasticizing admixtures, NOT by adding water. The addition of extra water to the mix will affect the uniformity of the color. Uneven curing and/or rapid drying of the concrete will also affect the uniformity of the color.

Custom colors are available for all products listed with adequate notice, contact your local Bomanite Licensed Contractor or Bomanite for information on custom color selections. Utilize a Pantone guide or provide a solid color for matching purposes.

Coal Gray	Gunmetal Gray	Seal Gray	Castle Gray	Mossrock	French Gray	Nickel Gray	Shale Gray	Natural Gray	Cobblestone Gray

*NOTE: Color swatches on this chart approximate as close as possible the final appearance of colored concrete. Variations can be expected due to the job conditions, finishing techniques, exposure of aggregates, use of sealers or coatings, curing methods and raw material drifts. Certain combinations of products and/or colors may produce dramatically different than anticipated color appearances. It is strongly advised that a sample be produced prior to installation of any product.
