Cobalt Blue	Deep Violet	Indigo Blue	Jet Black	Park Green

IMPORTANT NOTES:

Some colors may be more sensitive to UV exposure than others. Consult your local Bomanite Licensed Contractor or Bomanite Technical Services prior to selection of any questionable colors such as bright shades or custom colors.

When Bomanite Con-Color is applied to traditional concrete or any portland cement-based product the resulting color can be influenced by a range of factors. Age of substrate, cement color and content, moisture content, the presence of polymers or other admixtures, pozzolans such as fly ash or similar, the method of application, finishing techniques, mix designs, curing practices, condition of substrate, surface preparation, substrate porosity and the sealer selected along with other factors will all affect the final appearance. It is required that hard troweled or previously sealed surfaces be mechanically prepared by grinding prior to staining.

It is highly recommended that samples be created, viewed and approved using construction techniques and materials identical to those that will be used in the actual construction of the project. This sampling process must be completed prior to specifying the final color and appearance.

Licensed Contractor to request a color chart.

NOTE: The Bomanite Company strives to provide website users with the most accurate color information possible. Colors shown approximate as closely as possible the appearance of selected product, however the screen colors should only be used for ideas as these colors are low-resolution and do not represent final results. Please contact your local Bomanite Licensed Contractor to order product color charts and samples for the most accurate representation of available standard colors.
